We've heard you!

Dorevitch Pathology Extended Hours

Pathology services hours have now been extended due to demand. Pathology services had initially started with 1 room during limited hours, and now with 2 rooms and hours extended to 6 days a week and into the afternoon on weekdays.

We hope that the extended hours mean that you get to access pathology services more easily.

And as always, Dorevitch Pathology is located in our W3 waiting room, with separate seating from the other waiting areas and friendly phlebotomists ready to greet you.

Hours of Dorevitch Pathology operations:

Monday to Friday - 8.30am to 4.30pm

Saturday - 8am to 12noon

Sunday - Closed

Magazines

Many of you have asked for reading material in the waiting rooms.

Along with our newsletters, we have also placed more magazines in our waiting areas which we hope you will find useful whilst waiting for your appointment or whilst the people who have accompanied you to the clinic prefer to read whilst you are being attended to.

Let us know your feedback to help continue to improve your experience in the clinic.

Allied Health Services

Hearing Tests

To start off with our new Allied Health Services, we have continued to find ways to provide accessible medical services for our community, and have teamed up with Hearing Australia for this.

Hearing Australia is the nation's largest provider of government funded hearing services for children, young adults under 26, Aboriginal and Torres Strait islander people, pensioners and veterans.

They are now providing free 15 minute hearing checks at Box Hill Superclinic for patients who have concerns with hearing.

Speak with our receptionist if you would like to access this service.

Dietician

Carol Ho is an Accredited Practising Dietician (APD) and a member of the Dieticians Association of Australia (DAA).

She has been helping patients with cardiovascular disease, high cholesterols, high blood pressures, gout, fatty liver disease, irritable bowel syndrome, food allergies/intolerance, diabetes, gestation diabetes, failure to thrive, picky eating, weight management, malnutrition and wound healing.

Carol can speak fluent English, Cantonese and Mandarin.

She also bulk bills if you have a Chronic Disease Management Plan.

Speak to your GP or enquire more at our reception if you feel you could benefit from a consultation with Carol.

Physiotherapy

Box Hill Physiotherapy is now providing Physiotherapy services at the clinic. They are a local service with a team of physiotherapists who all hold post graduate qualifications and have been successfully helping clients for over 25 years.

They are providing bulk billed sessions under a Chronic Disease Management Plan.

Speak to your GP or enquire more at our reception if you would like to access physiotherapy services.

Bulk Billed Home Sleep Study

We are pleased to also team up with Centurion Healthcare to provide bulk billed home sleep study services from the clinic.

Centurion Healthcare is a physician-led specialist group involved in Respiratory and Sleep Disorders. Their clinical team includes Respiratory Heads of Departments at major public hospitals and former President and Secretary of the Thoracic Society of Australia and New Zealand (TSANZ).

Find out at reception how you can access this service directly from our clinic!
